

Our Smallest, Most Portable Spark Chamber Machine

The Magnawave Sol is our smallest, most portable spark chamber machine! Built with cutting-edge technology, the Sol has enough power for those that want a personal use MagnaWave machine at home or on the go. The Sol features an adjustable intensity dial and comes with a 10-minute static timer that keeps your Magnawave sessions short and easy. The MagnaWave Sol comes in a portable protective case which makes taking it anywhere effortless. The Sol comes with the Butterfly loop, the large loop, instruction manual, additional extension chord, and cleaning wipes.

Rent for \$150/week. This is a small machine that works great for horse abscesses or injuries like suspensory tears that can be treated daily during the rental. Also great for people dealing with depression/chronic single body issues that need more sessions than practitioner can provide. This is not the large powerful machine that works for full body treatment and does not go as deep into the tissue. However, with multiple use during the week, can be just as useful and provides needed results.
